

SCHMEISSER

# SMP Scope Mount

One-piece SMP cantilever scope mount with integrated 30mm rings. Off-set design gives the extra clearance needed for large or long eye relief scopes. Each top ring strap is secured with four Allen screws to prevent slippage.

Spring-assisted steel brackets hold tightly on any Picatinny receiver rail. The unique design makes it rock solid and still gives it a modern lightweight appearance. Also included is an additional Picatinny four-slot top rail for easy mounting of reflex sights or other accessories.
