

SOLID Multi-wire Carbine Buffer Spring and Buffer Set

The M-Series/AR-Series Carbine SOLID multi-wire buffer spring is German engineered to provide a more fluid motion that makes it quieter and reduces felt recoil. It is virtually unbreakable, but should the spring break, simply insert the pieces into the buffer tube and your rifle will continue to operate.

The M-Series/AR-Series Carbine Buffer prolongs the lifetime of the receiver.

GTIN

4251366500369

Description

Buffer & Buffer Multi-Spring

MSRP: \$50.45

Highlights

M-Series/AR-Carbine SOLID multi-wire buffer spring

High-tensile steel multi-wire spring is virtually unbreakable

Twisted out of three high-tensile steel wires for optimized reliability and a more fluid spring motion

If the spring should ever break, simply insert the pieces in the buffer tube and your rifle will continue to operate

Greatly reduces recoil and noise

M-Series/AR-Series Carbine Buffer

84 gram buffer made out of 6061-T6 aluminum

Prolongs lifetime of receiver
