

SCHMEISSER

SLIMLINE KEYMOD HANDGUARD, FREE FLOAT

The Schmeisser lightweight Free Float Slimline Keymod Handguard lets you mount an array of products exactly where you need them without the weight and bulk of unused rail space.

The handguard is equipped with HELICOIL® steel thread inserts that reinforce the threads, preventing galling threads, even with frequent use. The slim, less than 42mm body, securely fits in your hand to ensure ultimate grip and control.

The heat-treated barrel nut, made of German steel, is slightly longer for increased stability.
